

# Route 29 – Looking North

## **WE GOT THE JOB!**

### **Route 29 Bridge Over Little Rocky Run**

We are pleased to announce that Virginia Department of Transportation has awarded Shirley Contracting a \$11.4 million design-build contract for the Route 29 Bridge Over Little Rocky Run project in Fairfax County, Va.

Shirley will replace the structurally deficient bridge on Route 29 over Little Rocky Run and widen the road to accommodate a new six-lane bridge. The scope of work also will include a shared-use path on the south side of the bridge and a sidewalk on the north side for pedestrian access.

Additional project components include parapets, fixed object attachments and guardrails, pedestrian facilities, right-of-way acquisition, signing, and pavement marking. The project team also will be responsible for stormwater management, erosion and sediment control, utility relocations, and the development of a traffic management plan.

Design is underway and project completion is scheduled for October 2015.

Congratulations to everyone involved in this winning effort!
