

WE GOT THE JOB!

Dulles Discovery 3 Bridge

We are pleased to announce that The Peterson Companies has awarded Shirley a \$5.5 million design-assist contract for the Dulles Discovery 3 Bridge located in Chantilly, VA.

The project team will construct a bridge over Smithsonian Air and Space Parkway to provide a vehicular and pedestrian connection between two separate government campuses. The bridge will allow secure connections between each campus, over the public roadway. The three-span bridge structure will include long ramps supported by mechanically-stabilized walls.

The Shirley team was involved in the completion of the bridge design and provided economical solutions for several unique conditions, including a challenging schedule.

The project is underway and completion is scheduled for June 2014.

Congratulations to everyone involved in this winning effort.
