

Plan View of the New CSX Bridge

WE GOT THE JOB!

CSX JD to Jones Hill Double Tracking

We are pleased to announce that CSX Transportation has awarded Shirley Contracting a \$6 million contract for the CSX JD to Jones Hill Double Tracking project in Prince George's County, Md. The project will alleviate congestion on a portion of the CSX Alexandria Extension that often causes disruptions to the Maryland Transportation Authority's MARC train service.

Shirley will construct a four-pier ballast deck bridge across the Northeast Branch of the Anacostia River and convert the existing open deck bridge to a ballast deck bridge. The project team also will construct 1.9 miles of new railroad track and relocate two miles of existing track. Additionally, improvements will be made to the stormwater management system.

The project is currently underway and completion is scheduled for July 2014.

Congratulations to everyone involved in this winning effort.
