

WE GOT THE JOB!

Riverdale Bridge

We are pleased to announce that Calvin Cafritz Enterprises has awarded Shirley a \$14.5 million design-build contract for the Riverdale Bridge located in Prince George's County, MD.

The project team will design and construct a single span bridge over CSX railroad tracks to provide vehicle and pedestrian access to a 37-acre parcel of land in north Riverdale Park. The land is currently being zoned for redevelopment. Site constraints, elevations, and the position of the track crossing will add to the project's complex scope. The bridge over CSX will include mechanically-stabilized earth walls to support the bridge. The Shirley team also will construct an urban table top over the bridge to incorporate architectural features and provide green space for pedestrians accessing the redeveloped site on foot or by bicycle.

The design is underway and construction is schedule to being in late 2014. Project completion is scheduled for 2015.

Congratulations to everyone involved in this winning effort.
